

Preface	1	5 Countermeasures for improving revenue earning water ratio	18
I History of Water Utility	2	6 Created clean energy by hydraulic power and solar power	18
1 Water utility and industrial water supply business	2	7 Financial conditions	18
2 Sewer system	4	1 Outline of water utility finances	18
II Main Water Utility	6	2 Account settlement in FY2018 (including tax)	19
Water Utility	6	Water wholesale business	20
1 Current conditions and issues of water utility	6	1 Current conditions of water wholesale business	20
1 Changes of water demand	6	1 History and outline	20
2 Issues and responses for the future	6	2 Water supply conditions	20
3 Main measures and projects to be implemented	7	3 System diagram of waterworks facilities	21
4 Promotion system	7	4 Water rates	21
2 Current conditions of water utility	8	5 Main water supply facilities	22
1 Amount of water supply	8	6 Financial conditions	23
2 Served water supply	8	III Industrial Water Supply Business	24
3 Water demand classified by meter diameter	9	1 Current conditions of industrial water supply business	24
4 Capacity of water supply facilities and water resources	10	1 Current conditions	24
5 Main water supply facilities	12	2 Main water supply facilities	26
3 Water quality	15	3 Financial conditions	26
1 Water quality monitoring in water resources	16	IV Sewer System	28
2 Water quality management in water purification plants	16	1 Roles and outline of the sewer system	28
3 Water quality monitoring at tap	16	1 Roles of the sewer system	28
4 Activities to keep safer and toward better quality	16	2 Current conditions of the sewer system project	29
4 Earthquake disaster countermeasures	16	3 Problems and responses for the future	32
1 Earthquake-resistant measures for waterworks facilities	16	2 Sewer system planning	33
2 Various measures relating to emergency water supply	17	1 Priority policy program for the development of social infrastructure	33
3 Project for North Fukuoka emergency transmission pipe	17	2 Sewer system improvement project	33
		3 Effective use of sewer system resources	35
		1 Utilization of treated water	35
		2 Utilization of sludge	36
		3 Utilization of unused energy	37
		4 Effective use of sewer system facilities	37
		4 Financial conditions	38
		1 Outline	38
		2 Financial mechanism	38
		3 Account settlement in FY2018 (including tax)	39
		V International Projects	40
		1 International technical cooperation	40
		2 Overseas water business	42
		VI Customer Service	46
		1 Contact point for customers	46
		1 Water and sewer customer center's main duties	46
		2 Water bill payment center's main duties	46
		2 Beneficiary charge for sewer system projects	47
		3 Sewer service charge	47
		4 Measures for the promotion of sewage system connections for toilets	47
		5 Main duties of the construction offices	48
		1 Duties concerning water utility	48
		2 Duties concerning sewer system	48
		6 Public relations activities	49
		VII Organization of Kitakyushu City Water and Sewer Bureau	51
		1 Organization chart	51
		2 Segregation of duties (As of September 1, 2019)	52
		3 Number of personnel	54
		4 List of offices of Water and Sewer Bureau	54
		Reference	55

Contents

• Photographs on the cover

<Top right>

Water tank truck additionally deployed in March 2019
(A scene at the joint emergency drill with
Kyushu Branch Office, Japan Water Works Association)

<Bottom right>

Extension of rainwater storage piping
(Sakuramachi-Kitaminato rainwater storage piping,
start of use: June 2019)
